

## DESCRIPTION

Analog Devices Power Supplies are designed to provide OEMs and circuit designers with a broad line of high reliability, regulated and short circuit protected power supplies at low overall cost. These modules are available with 5 volt to 24 volt output (single and dual), and current ratings from 25mA to 1 amp. Most Analog Devices Power Supplies are available from stock in both large and small quantities. Substantial discounts apply on quantity orders.

## ADVANTAGES

Packaged circuit modules have found wide acceptance. Engineers have discovered the convenience and economy of plug-in building blocks ... op amps, logic cards, miniature A/D and D/A converters are now available in wide varieties. Now a complete line of modular power supplies is available from Analog Devices. Most of these units are packaged in the popular encapsulated case. They are shipped ready to use, at prices below the internal manufacturing cost of most OEM users. Further savings and reduced lead time are achieved by eliminating engineering start-up, documentation costs, and manufacturing delays. Designed by experts in op amp and digital logic technology, these units offer features that you would expect to find only in considerably more expensive supplies.

## ENCAPSULATED MODULES (900 SERIES)

This line of modular power supplies covers most popular applications except for high current loads. These supplies all feature line and load regulation and are short circuit protected. Mating sockets are available, or the unit may be mounted on and soldered directly to a printed circuit card. Voltage ranges include 5VDC to  $\pm 24$ VDC. Current ranges extend from 25mA up to 1 amp.

## METAL CASED MODULES (900 SERIES)

The  $\pm 15$ VDC, 300mA, 500mA and 1 amp cased power supplies are designed with the system designer's needs in mind. These units provide the power needed to run large Modularized, Transistorized and Integrated Circuit systems. The 300 and 500mA supplies come in 3.5 inch cube cases with an 11 pin connector (supplied). The  $\pm 15$  volt, 1 amp unit is mounted in a finned case and has barrier terminal strip connectors. All of these units provide for remote sensing.

## EXTRA-HIGH ACCURACY SUPPLIES (MPD SERIES)

Analog Devices "MPD" line of Power Supplies are intended for applications where the ultimate in performance is required. They feature excellent regulation and low temperature coefficients. Typical applications include providing stable references for computing, instrument, and data reduction circuitry. All MPD supplies are sealed in anodized aluminum enclosures for maximum ruggedness and minimum RFI. Being essentially DC to DC converters, these units feature low "see through" capacitance (typically 20pF) and are desirable for powering floated circuits and use in systems having considerable ground noise.

## OPTIONS

Most supplies are available with 205-240VAC, 50-400Hz input at no additional charge. Specify option "E" when ordering. Models 904 and 909 are available with a transformer shield which reduces input to output see-through capacity to 10pF max. Specify option "I" when ordering and add \$8 each to unit prices. Model 906 (5VDC/250mA) available with 6.0VDC overvoltage protection at \$8 each additional. All other 5VDC logic supplies (Models 903 and 905) include overvoltage protection at no additional charge.

## 900 SERIES, MPD SERIES MODULAR POWER SUPPLIES FOR OP AMPS & LOGIC CIRCUITRY

## FEATURES

Short Circuit Protected  
Line & Load Regulated  
Small Size  
5VDC to  $\pm 24$ VDC  
25mA to 1000mA  
Temperature Compensated  
Low Cost, from \$23 (1-9)

# Model 950 Power Supply Manifold

## REFERENCE GUIDE

This 950 power supply manifold provides a fast, convenient, and inexpensive bench supply for breadboarding, testing, or general laboratory use. Five ports are supplied which enable the 900 series P-1 cased modules to be directly plugged-in to this manifold. Three output terminals provide easy user access to selected dual DC output or single DC output voltage source. Cost is just \$82.00.

## OPTIONS AVAILABLE

- "E" Option— 205-240VAC, 50-400Hz input. No additional charge.
- "I" Option— Units have transformer interwinding shield with separate ground lead. Maximum input to output see-through capacitance with this option is 10pF. \$8 additional per unit.
- "D" Option— Overvoltage protection available at \$8/unit additional charge. Nominally at 1 volt above rated output.
- "H" Option— 220-260VAC, 50-400Hz input. No additional charge.

## GENERAL INFORMATION

1. All supplies have 105-125VAC, 50-400Hz input unless Option "E" is ordered.
2. All Cube "C" case modules shipped with mating 11 pin Amphenol connector at no additional charge.

3. MPD series supplies housed in Aluminum cases for maximum RFI suppression.
4. All supplies are short circuit protected except MPD series supplies are not short protected between different outputs. MPD5-150A short protected only on 5VDC output.

## FOOTNOTES

- \*Indicates "maximum" specification.
- <sup>1</sup> Derate 5mA/°C above +55°C.
- <sup>2</sup> Derate 12mA/°C above +50°C.
- <sup>3</sup> Derate 7mA/°C above +55°C.
- <sup>4</sup> Overvoltage protection at 6.5VDC included.
- <sup>5</sup> Aluminum "P" case. Tolerance is increased to 0.05" on the 2.50" and 3.50" dimension.
- <sup>6</sup> Outputs track within 1% (¾% for Model 904).

## MODEL 950 POWER SUPPLY MANIFOLD

This manifold permits use of the 900 series "P" cased modules on the design bench. In combination with these supplies the 950 provides a safe, convenient, and inexpensive bench supply for breadboarding, testing, or general laboratory use. Cost is just \$16 (1-9), and \$15 (10-24).

## MODEL 194 AMPLIFIER MANIFOLD

The Model 194 manifold is ideal for experimenting, breadboarding, and/or teaching with op amps. Completely self-contained, it includes a ±15VDC 100mA power supply, and accepts up to 5 amplifiers in the popular 7 pin "Q" case configuration. Adapters are available for other configurations and provisions are made for a balance potentiometer for each amplifier. The unit is designed for maximum flexibility, with all connection points 3/4 in. apart. Price is \$250 each (1-9), substantially less in higher quantities.
