

Use board 036787 Rev B as an initial starting point. The board may need to increase slightly in size.

50 ohm traces are to be 25 mils wide.

The 50 ohm traces and the ground adjacent should be free of solder mask.

Series components may have a small solder mask outline around them.

Inductors should be Coilcraft inductors. Cap should be Murata capacitors.

RF connectors to be ADI 12-1-45
