

# LT8393 60V<sub>IN</sub>, 100V<sub>OUT</sub> Synchronous 4-Switch Buck-Boost LED Driver with Low EMI

## DESCRIPTION

Demonstration circuit 2865A is a synchronous 4-switch buck-boost LED driver featuring the [LT<sup>®</sup>8393](#). This demonstration circuit drives a single string of LEDs up to 70V at 300mA. DC2865A runs from an input voltage of 9V to 18V as-built and is capable of 4V<sub>IN</sub> to 60V<sub>IN</sub> if UVLO is adjusted. It runs at 350kHz switching frequency and features spread spectrum modulation (SSFM) which spreads the switching frequency from  $f_{SW}$  to  $f_{SW} + 25\%$ . Both analog and PWM dimming are featured. DC2865A features undervoltage lockout (UVLO) set at 7.9V with 1.4V hysteresis for turn-on.

The LT8393 has an adjustable switching frequency between 350kHz and 2MHz. The SYNC jumper also allows external frequency synchronization.

The LT8393 can be PWM dimmed for accurate brightness control with an external PWM signal and an internally-generated PWM signal. DC2865A has a jumper that can be set to switch between internally-generated PWM signal, externally-generated PWM signal, and no PWM signal (100% on). It can be analog dimmed with a control voltage on its CTRL pin.

When run with both PWM dimming and spread spectrum, the spread spectrum aligns itself with the PWM signal for flicker-free operation.

The LT8393 features both open LED and short LED (LED<sup>+</sup> to GND) protection as well as a fault output flag.

Small ceramic input and output capacitors save space and cost. The open LED overvoltage protection uses the IC's constant voltage regulation loop to regulate the output to approximately 70V if the LED string is opened.

The input and output EMI filters on the demo circuit reduce the EMI of this power converter. This is intended for automotive applications where CISPR25 Class 5 standards are observed. Additionally, gate resistors and grounded shield can be added on the demo circuit for further EMI reduction if necessary. In non-automotive applications, where EMI may not be as important, the input and output filter can be removed for higher efficiency.

The UVLO voltage, LED current, output voltage range, switching frequency, brightness control, and SSFM can all be adjusted with simple modifications to the demonstration circuit.

The LT8393 data sheet gives a complete description of the device, operation and applications information. The data sheet must be read in conjunction with this demo manual for DC2865A. The LT8393JFE is assembled in a 28-lead plastic TSSOP package with a thermally enhanced GND.

## DC2865A

### BOARD PHOTO

### PERFORMANCE SUMMARY Specifications are at $T_A = 25^\circ\text{C}$

PARAMETER	CONDITION	MIN	TYP	MAX	UNIT
Input Voltage $V_{IN}$ Range	Operating $24\text{V} \leq V_{LED} \leq 70\text{V}$	4		60	V
Switching Frequency ( $f_{SW}$ )	R3 = 422k $\Omega$ , SSFM = OFF R3 = 422k $\Omega$ , SSFM = ON		350 350 – 437.5		kHz kHz
LED Current $I_{LED}$	R2 = 330m $\Omega$ , $9\text{V} < V_{IN} < 18\text{V}$ $24\text{V} \leq V_{LED} \leq 70\text{V}$ , $V_{CTRL} = 2\text{V}$	297	300	303	mA
LED Voltage $V_{LED}$ Range	R5 = 1M $\Omega$ , R6 = 11.3k $\Omega$ , R26 = OPEN	24		70	V
Open LED Voltage $V_{OUT}$	R5 = 1M $\Omega$ , R6 = 11.3k $\Omega$ , R26 = OPEN	88	94	98	V
Efficiency (100% PWM DC)	12.0V $V_{IN}$ , 350kHz, 24 LEDs, SSFM = ON		90		%
Internally-Generated PWM Dimming Range	JP2 = INT, JP3 = INT	1/16384		100	%
Internally-Generated PWM Dimming Frequency	JP2 = INT, JP3 = INT R21 = 51k $\Omega$ , R3 = 422k $\Omega$		350		Hz
Peak Switch Current Limited Boost Region	R1 = 0.006 $\Omega$		8		A
Peak Switch Current Limited Buck Region	R1 = 0.006 $\Omega$		8		A
$V_{IN}$ Undervoltage Lockout (UVLO) Falling	R7 = 499k $\Omega$ , R8 = 127k $\Omega$		6.1		V
$V_{IN}$ Enable Turn-On (EN) Rising	R7 = 499k $\Omega$ , R8 = 127k $\Omega$		7.3		V

## QUICK START PROCEDURE

NOTE: Make sure that the voltage applied to  $V_{IN}$  does not exceed 60V.

The DC2865A is easy to set up to evaluate the performance of the LT8393. Refer to Figure 1 for proper measurement equipment setup and follow the procedure below.

1. With power off, connect a string of LEDs that will run with a forward voltage less than or equal to 70V at 300mA to the LED<sup>+</sup> and LED<sup>-</sup> terminals on the PCB as shown in Figure 1.
2. Connect the EN/UVLO terminal to GND.
3. For always-on LED operation: Set JP2 to EXT/ON and JP3 to ON. Set JP1 to NO SSFM/SYNC to run without SSFM.
4. With power off, connect the input power supply to the  $V_{IN}$  and GND terminals.
5. Turn the input power supply on and make sure the voltage is between 9V and 18V to start operation.
6. Release the EN/UVLO-to-GND connection.
7. Observe the LED string running at the programmed LED current.
8. To change the brightness with analog dimming, simply attach a voltage source to the CTRL terminal and set the voltage between 0V and 2V. See data sheet for details.
9. To change brightness with external PWM dimming, set JP2 to EXT/ON and JP3 to EXT. Keep LED wire length to a minimum to achieve higher dimming ratios. Attach a 0V – 3V rectangular waveform with varying duty cycle to the PWM terminal.
10. To change brightness with internally-generated PWM dimming, set JP2 to INT and JP3 to INT. Adjust the setting of VR1 variable resistor with a small flathead screwdriver to toggle between 0% and 100% PWM dimming duty cycle in 1/128 steps.
11. To enable spread spectrum frequency modulation, set JP1 to SSFM ON.

## SCHEMATIC DIAGRAM

### ESD Caution

**ESD (electrostatic discharge) sensitive device.** Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

### Legal Terms and Conditions

By using the evaluation board discussed herein (together with any tools, components documentation or support materials, the "Evaluation Board"), you are agreeing to be bound by the terms and conditions set forth below ("Agreement") unless you have purchased the Evaluation Board, in which case the Analog Devices Standard Terms and Conditions of Sale shall govern. Do not use the Evaluation Board until you have read and agreed to the Agreement. Your use of the Evaluation Board shall signify your acceptance of the Agreement. This Agreement is made by and between you ("Customer") and Analog Devices, Inc. ("ADI"), with its principal place of business at One Technology Way, Norwood, MA 02062, USA. Subject to the terms and conditions of the Agreement, ADI hereby grants to Customer a free, limited, personal, temporary, non-exclusive, non-sublicensable, non-transferable license to use the Evaluation Board FOR EVALUATION PURPOSES ONLY. Customer understands and agrees that the Evaluation Board is provided for the sole and exclusive purpose referenced above, and agrees not to use the Evaluation Board for any other purpose. Furthermore, the license granted is expressly made subject to the following additional limitations: Customer shall not (i) rent, lease, display, sell, transfer, assign, sublicense, or distribute the Evaluation Board; and (ii) permit any Third Party to access the Evaluation Board. As used herein, the term "Third Party" includes any entity other than ADI, Customer, their employees, affiliates and in-house consultants. The Evaluation Board is NOT sold to Customer; all rights not expressly granted herein, including ownership of the Evaluation Board, are reserved by ADI. CONFIDENTIALITY. This Agreement and the Evaluation Board shall all be considered the confidential and proprietary information of ADI. Customer may not disclose or transfer any portion of the Evaluation Board to any other party for any reason. Upon discontinuation of use of the Evaluation Board or termination of this Agreement, Customer agrees to promptly return the Evaluation Board to ADI. ADDITIONAL RESTRICTIONS. Customer may not disassemble, decompile or reverse engineer chips on the Evaluation Board. Customer shall inform ADI of any occurred damages or any modifications or alterations it makes to the Evaluation Board, including but not limited to soldering or any other activity that affects the material content of the Evaluation Board. Modifications to the Evaluation Board must comply with applicable law, including but not limited to the RoHS Directive. TERMINATION. ADI may terminate this Agreement at any time upon giving written notice to Customer. Customer agrees to return to ADI the Evaluation Board at that time. LIMITATION OF LIABILITY. THE EVALUATION BOARD PROVIDED HEREUNDER IS PROVIDED "AS IS" AND ADI MAKES NO WARRANTIES OR REPRESENTATIONS OF ANY KIND WITH RESPECT TO IT. ADI SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS, ENDORSEMENTS, GUARANTEES, OR WARRANTIES, EXPRESS OR IMPLIED, RELATED TO THE EVALUATION BOARD INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY, TITLE, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. IN NO EVENT WILL ADI AND ITS LICENSORS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES RESULTING FROM CUSTOMER'S POSSESSION OR USE OF THE EVALUATION BOARD, INCLUDING BUT NOT LIMITED TO LOST PROFITS, DELAY COSTS, LABOR COSTS OR LOSS OF GOODWILL. ADI'S TOTAL LIABILITY FROM ANY AND ALL CAUSES SHALL BE LIMITED TO THE AMOUNT OF ONE HUNDRED US DOLLARS (\$100.00). EXPORT. Customer agrees that it will not directly or indirectly export the Evaluation Board to another country, and that it will comply with all applicable United States federal laws and regulations relating to exports. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the substantive laws of the Commonwealth of Massachusetts (excluding conflict of law rules). Any legal action regarding this Agreement will be heard in the state or federal courts having jurisdiction in Suffolk County, Massachusetts, and Customer hereby submits to the personal jurisdiction and venue of such courts. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Agreement and is expressly disclaimed.
