

Keysight 34830A BenchLink Data Logger Pro Software for 34970A

The Keysight Technologies, Inc. BenchLink Data Logger Pro software for the 34970A provides a convenient way to collect and analyze your data. The software is a Windows-based application that uses a familiar spreadsheet environment to define measurement data to be collected. The tab-based format makes it easy to set up multiple scans and initiate scans based on predefined limits. Simply identify the measurements you want to acquire, define limits and actions to be performed, and then initiate the process. Your data is then collected, evaluated and acted on real-time. With the BenchLink Data Logger Pro Software you get advanced data logging and decision making capabilities without spending hours programming.

Key features

- Quick test setup and execution
- Create multiple scan lists
- Execute different events based on predefined limits
- Use advanced math formulas
- Collect, monitor and manage data
- Present data on a single or multiple graphs
- Export data to other applications for presentation and analysis

34970A/34972A plug-in modules
