

Data Acquisition for High-Speed Medical Imaging

Explore the range of high-speed digitizers

- 100 MS/s to 8 GS/s on one or more channels
- Vertical resolution of 8, 10, 12 or 14 bits
- Bandwidths of up to 3 GHz
- Flexible acquisition memory
- Fast throughput with on-board real-time processing
- On-board real-time signal processing using FPGA

Select and compare the digitizer that best fits your need.
