

Agilent 33500 Series Waveform Generators

Accessing Documentation When and Where You Need It

Technical Overview

As the pace of the electronics industry continues to increase, fast access to accurate information becomes more important than ever. Also, many people want to access information in a variety of formats: as printed documents, on a PC, via an Internet browser, or on a smart phone or tablet computer.

To meet these needs, Agilent now offers a fully integrated set of user, service, and SCPI programming documentation for the Agilent 33500 Series waveform generators. The document uses a streamlined writing style that makes extensive use of graphical images, and it is available in English, French, German, Japanese, Korean, Russian, and Simplified Chinese on a CD that is included with your instrument. You can also download the latest documentation from the Agilent Web site by pressing **View Products** at www.agilent.com/find/33500. A version of the documentation optimized for viewing on mobile devices is available at www.agilent.com/find/33500doc. You can also use a QR code app and the camera on your smart phone or tablet to scan the QR code in Figure 1.

Figure 1. Scan the QR code to pull up 33500B documentation on your mobile device.

The QR code is also printed on the CD included with your instrument, and as of firmware version 2.x, you can view the QR code on the instrument's display by pressing **[System] > Help > View documentation on your mobile device**.

Delivering this integrated documentation in seven languages and in multiple delivery formats enables you to get product documentation when and where you need it. Agilent looks forward to receiving your feedback on this new approach so we can help you get your jobs done faster, regardless of where you happen to be located.

Figure 2. Wherever you see the QR code, simply run the QR code app on your mobile device and point the device's camera at the QR code.

Agilent Advantage Services is committed to your success throughout your equipment's lifetime. To keep you competitive, we continually invest in tools and processes that speed up calibration and repair and reduce your cost of ownership. You can also use Infoline Web Services to manage equipment and services more effectively. By sharing our measurement and service expertise, we help you create the products that change our world.
