

CHANNEL VISION *Central*

C-0508 Data Termination Module

Channel Vision's new C-0508 is the data module you've been asking for - literally! We believe that our customers are a critical part of our product development team. When our customers told us how we could make our old data module (model C-0501) even better, we listened. That valuable feedback helped us generate the new and improved C-0508. You'll notice that we've made the color code easier to follow, the RJ-45 clips easier to access, and added standard 110 connectors to minimize confusion.

**NEW
C-0508**

Replaces: C-0501
