

ESA GSM/GPRS Measurement Personality (Option 252/BAH)

There are 2 different versions of the Option BAH GSM measurement personality that are available for download from this page:

- **Version C.01.02** - The latest version which **DOES** include the Option 252 EDGE software. (additional license key required)
- **Version B.01.19** - The previous version which **DOES NOT** include the Option 252 EDGE software.

The previous version is still being provided in this case so that memory space can be conserved when Option 252 is not needed.

The C.01.02 GSM Measurement Personality can be obtained using one of the following two methods:

- If you already have a license for this personality you can download the latest version from this site for free to a Microsoft Windows based Personal Computer.
- If you do not have a license for this personality you will need to order an E440xBU-BAH upgrade kit. If you would also like to have the EDGE capability order E440xBU-252 as well.

Note: This GSM Measurement Personality version is only for use with ESA-E Series Spectrum Analyzers with firmware version A.14.00 or newer.

The "**ESA Personality Installation Procedure**" will guide you through:

- Downloading the installation image
- Creating an installation floppy disk set
- Loading the software into your ESA
- Verifying the installation

Current Version **Previous Versions**

How to Download

- See Documentation

How to Install

- See Documentation
- [Update Instructions ==>Windows 7 & 8](#)
- [Update Instructions ==>Windows XP, NT, Vista, 200, 98, etc...](#)

Installs on: Instrument

Prerequisites

- See Documentation

Licensing

- Requires a License

Supported Instruments

- E440xBU BAH

Add-On Software / Utilities

- [ESA Measurement Personality Software and Firmware](#)
