

# Agilent Technologies

## *Thunderbolt Transmitter & Receiver (Tx/Rx) Compliance Test*

## *Test Solution Overview Using the Agilent E5071C ENA Option TDR*

Last Update 2013/06/18 (TH)

# Purpose

- This slide will show how to make return loss measurements of **Thunderbolt Compliance Tests** by using the Agilent E5071C ENA Option TDR.
- The DUT includes:
  - **Host/Device Transmitter** (Return Loss)
  - **Host/Device Receiver** (Return Loss)

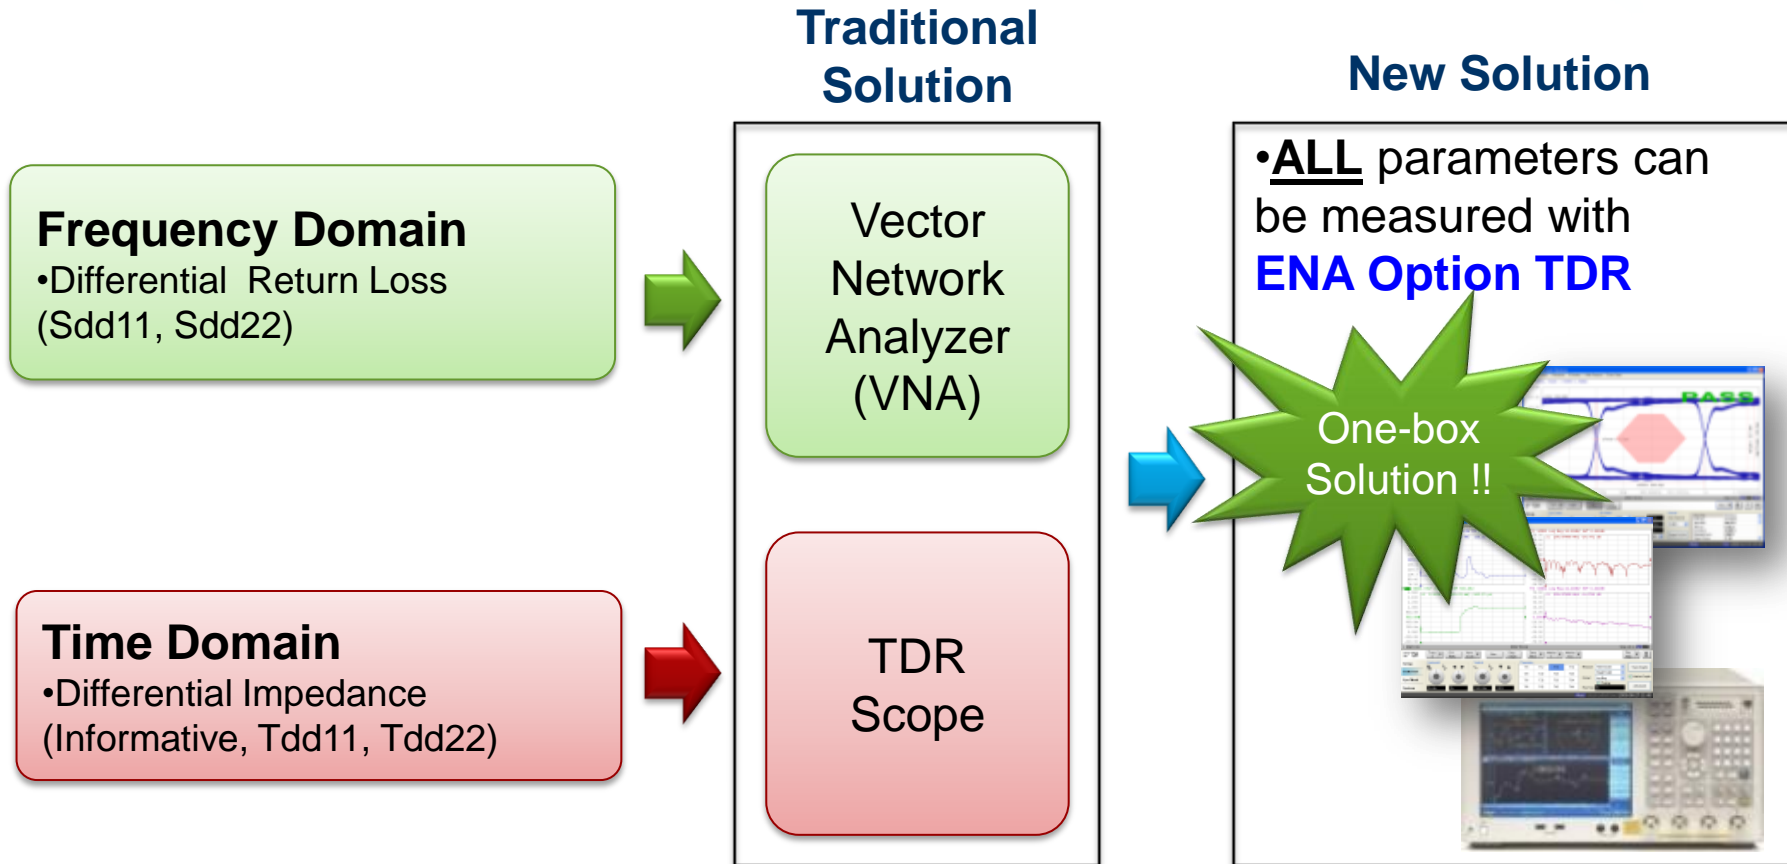

# Reference Document

- Thunderbolt Interconnect Specification Revision 0.9.
- Thunderbolt Transmitter, Receiver, and Return Loss Compliance Testing Method of Implementation (MOI) Using Agilent Instrumentation Revision 0.9 (provided by Granite River Labs Inc.)

# Thunderbolt Tx/Rx Compliance Test Solution

## Solution Overview

- The ENA Option TDR performs measurements in both time and frequency domains.

# Thunderbolt Tx/Rx Compliance Test Solution

## ENA Option TDR Solution

- ENA Mainframe

- E5071C-480: 4-port, 9 kHz to 8.5 GHz
- E5071C-485: 4-port, 100 kHz to 8.5 GHz
- E5071C-4D5: 4-port, 300 kHz to 14 GHz
- E5071C-4K5: 4-port, 300 kHz to 20 GHz

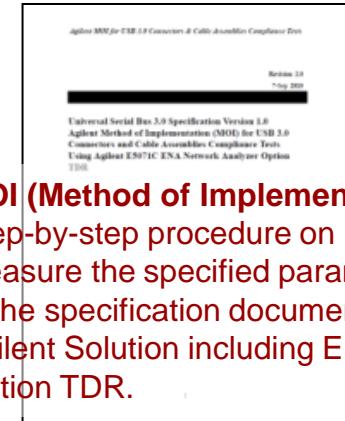

- Enhanced Time Domain Analysis Option (E5071C-TDR)

- ECal Module

- N4431B for E5071C-480/485
- N4433A for E5071C-4D5/4K5

•Method of Implementation (MOI) document and state files for the E5071C-TDR is available (\*) for easy setup and measurements of compliance testing.

\* Contact Agilent sales representative for more detail.

**MOI (Method of Implementation)**  
Step-by-step procedure on how to measure the specified parameters in the specification document using Agilent Solution including ENA Option TDR.

# Thunderbolt Tx/Rx Compliance Test Solution

## Test Setup of Return Loss Measurements

## Test Fixture

A Wilder TF-TB-TPA-P Thunderbolt Plug Test Adapter and two sets of low loss 50-Ohm matched pair cables are used, one pair for each transmit lane. Wilder test fixtures are available from [www.wilder-tech.com](http://www.wilder-tech.com).

## Micro-Controller Board

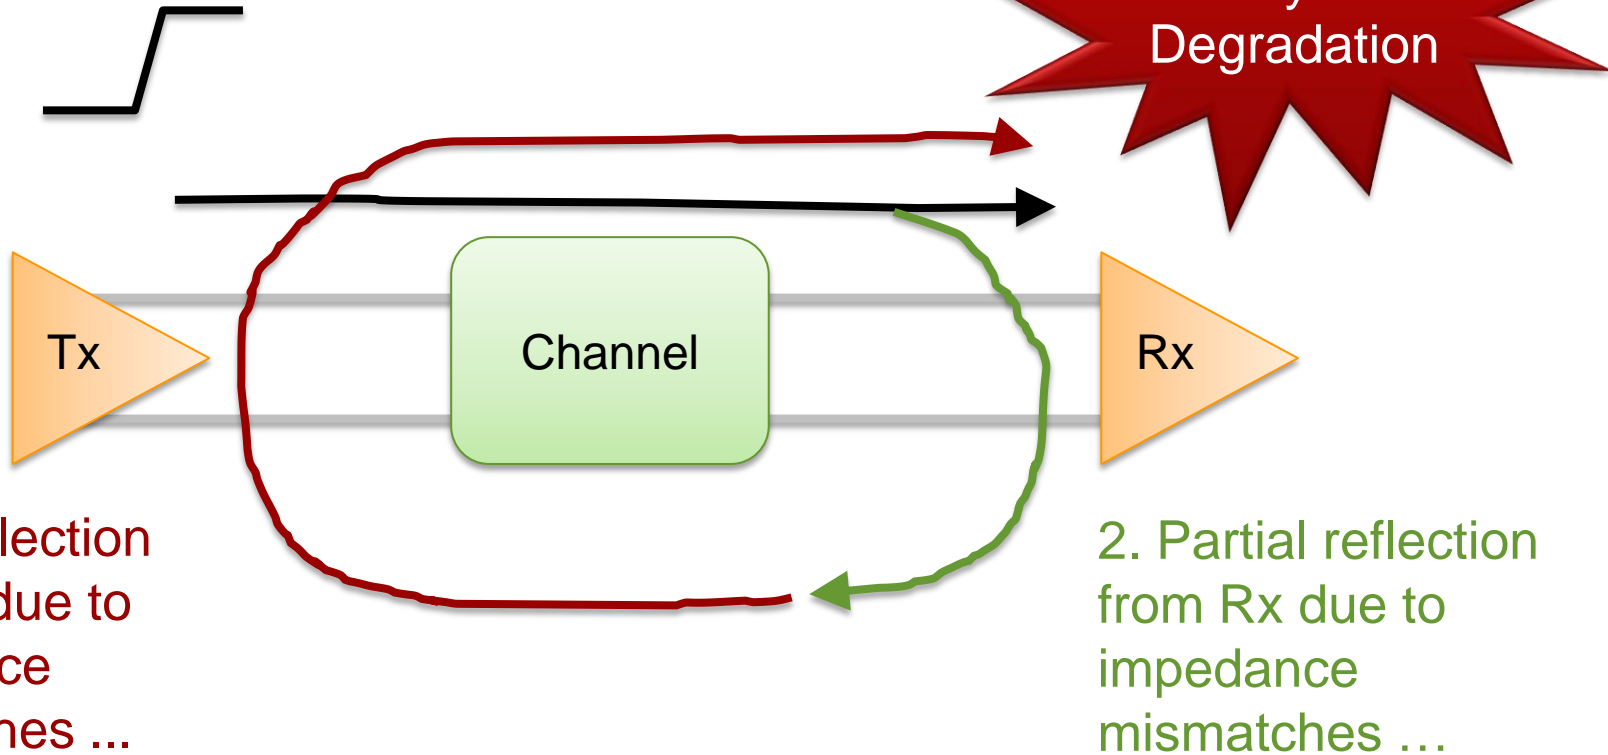

A Wilder TF-TB-TPA-PU Thunderbolt Micro-Controller Board is used to communicate with the DUT and put it in the proper test mode.

# Hot TDR Measurements

## Why Measure?

1. Signal transmitted from Tx ...

3. Re-reflection from Tx due to impedance mismatches ...

2. Partial reflection from Rx due to impedance mismatches ...

•Typically, impedance of device in OFF state and ON state (Hot TDR) is significantly different.

# Hot TDR Measurements

## Why Measure?

### Source Termination Effects

Source Impedance **NOT** Matched

Source Impedance Matched

# Hot TDR Measurements

## Thunderbolt

### 4.6.1 Host/Device Transmitter Compliance Specifications

- The Thunderbolt Host/Device Transmitter must be driving **PRBS31** pattern during the compliance testing.

### 4.8.2 Dongle Transmitter Compliance Specifications

- The Thunderbolt dongle transmitter must be driving **PRBS31** test pattern during the compliance testing.

# Advantages of ENA Option TDR for Hot TDR

## Fast and Accurate Measurements

### TDR Scopes

- **wideband receiver** captures all of the signal energy from the transmitter

**Extensive averaging** is necessary to obtain a stable waveform.

### ENA Option TDR

- **narrowband receiver** minimizes the effects of the data signal from the transmitter

In many cases, **averaging is not necessary** to obtain a stable waveform.

# Thunderbolt Tx/Rx Compliance Test Solution

## Measurement Parameters

**ENA Option TDR** Compliance Testing Solution is one-box solution which provides complete characterization of interconnects (time domain, frequency domain.)

## Certified Test Centers using ENA Option TDR

### Test Centers Support ENA Option TDR

ENA Option TDR is used world wide by certified test centers of USB, HDMI, DisplayPort, MHL, Thunderbolt and SATA.

# Thunderbolt Tx/Rx Compliance Test Solution

## Summary

### ENA Option TDR Compliance Testing Solution is ....

- **One-box solution** which provides complete characterization of high speed digital interconnects (time domain, frequency domain, eye diagram)
- **Fast and Accurate** output impedance measurements of transmitters in operating mode (**Hot TDR / Hot Return Loss**)
- Adopted by test labs worldwide

# Advantages of ENA Option TDR for Hot TDR

## ESD Robustness

### TDR Scopes

TDR scopes are sensitive to ESD.

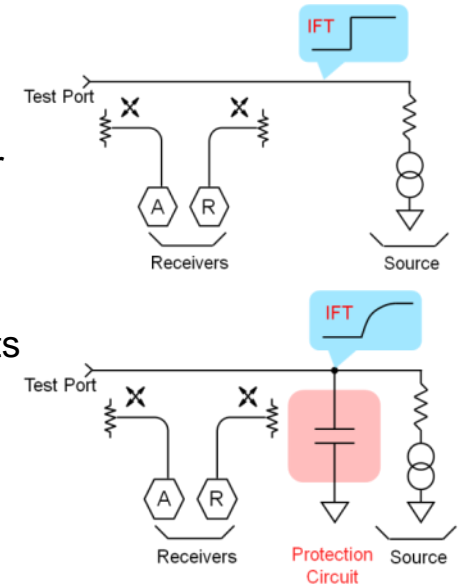

Implementing a protection circuit is difficult, because it will slow down the rise time of the step stimulus.

### ENA Option TDR

ENA Option TDR has higher robustness against ESD, because protection circuits can be implemented more easily.

ENA Option TDR measures the vector ratios of the transmitted and received signals. Therefore, the effects of the protection circuit will be canceled out.

Proprietary ESD protection chip significantly increases ESD robustness, while at the same time maintaining **excellent RF performance** (22ps rise time for 20GHz models).
