

Cable Statement:

A double shielded and properly terminated external interface cable must be used with this equipment when interfacing with the ALTITUDE ENCODER INPUT Connector.

For continued EMC compliance, all external cables, except supplied Antenna coaxial cable, must be 3 meters or less in length.

Nomenclature Statement:

In this manual the Test Set or Unit refers to the ATC-600A-2 Transponder and DME Test Set.

ESD Statement:

An Electrostatic Discharge (ESD) to either Front Panel Edge Meter may cause a momentary deflection of the Meter.
