

HPR1XX SERIES
0.75 WATTS
UNREGULATED

DC/DC CONVERTERS

MINIATURE SIP, DIP AND SMD PACKAGES

FEATURES

- LOW COST
- SINGLE-IN-LINE PACKAGE (SIP)
- INTERNAL INPUT AND OUTPUT FILTERING
- NON-CONDUCTIVE CASE
- HIGH OUTPUT POWER DENSITY: 10 WATTS/INCH³
- EXTENDED TEMPERATURE RANGE:- 25°C to +85°C
- HIGH EFFICIENCY: to 80%

DESCRIPTION

The HPR1XX Series uses advanced circuit design and packaging technology to deliver superior reliability and performance. A 170kHz push-pull oscillator is used in the input stage. Beat-frequency oscillation problems are reduced when using the HPR1XX Series with high frequency isolation amplifiers.

Reduced parts count and high efficiency add to the reliability of the HPR1XX Series. The high efficiency of the HPR1XX Series means less internal power dissipation, as low as 190mW. With reduced heat dissipation the HPR1XX Series can operate at higher temperatures with no degradation. In addition, the

high efficiency of the HPR1XX Series means the series is able to offer greater than 10 W/inch³ of output power density. Operation down to no load will not impact the reliability of the series, although a 1mA minimum load is needed to realize published specifications.

The HPR1XX Series provides the user low cost without sacrificing reliability. The use of surface mounted devices and advanced manufacturing technologies make it possible to offer premium performance and low cost.

ABSOLUTE MAXIMUM RATINGS

Internal Power Dissipation.....	450mW
Short Circuit Duration.....	Momentary
Lead Temperature (soldering, 10 seconds max).....	+300°C *

* NOTE: Refer to Reflow Profile for SMD Models.

ORDERING INFORMATION

	HPR 1XX V/W /H
Device Family _____	
HPR Indicates DC/DC Converter	
Model Number _____	
Selected from Table of Electrical Characteristics	
Package Option _____	
There is "no" package designator for the SIP package	
V = DIP Package	
W = SMD Package	
Screening Option _____

Notes:
 All dimensions are in inches (millimeters).
 GRID: 0.100 inches (2.54 millimeters)
 PIN PLACEMENT TOLERANCE: ±0.015"
 Marked with: specific model ordered, date code, job code.

MATERIAL: Units are encapsulated in Iso-ThermoFlex™, a low thermal resistance molding compound which has excellent chemical resistance, wide operating temperature range, and good electrical properties under high humidity environments. The encapsulant and outer shell of the unit have UL94V-0 ratings. Lead material is phosphor bronze with a solder plated surface to allow ease of solderability.

TYPICAL PERFORMANCE CURVES

Specifications typical at $T_A = +25^\circ\text{C}$, nominal input voltage, rated output current unless otherwise specified.

SAFE OPERATING AREA

NOTES:

- 1.) When operated within the SAFE OPERATING AREA as defined by the above curves, the output voltage of HPR1XX devices is guaranteed to be within 95% of its steady-state value within 100 milliseconds after the input voltage has reached 95% of its steady-state value.
- 2.) For dual output models, total load capacitance is the sum of the capacitances on the plus and minus outputs.
