

Portions of this product ship with Open Source materials. The notices and provisions that follow apply only to the discrete Open Source component identified below and not to any of Keithley Instruments, Inc.'s proprietary software.

mDnsWrapper

mDnsWrapper encapsulates the mDNS (Bonjour) functionality provided by the "Embedded mDNS" project developed by Chris Stawarz for Bonjour version 107.6 by Apple. The code developed by Chris and Apple is covered by the Apache License, Version 2.0 (see <http://www.apache.org/licenses/LICENSE-2.0>).

For more information about the mDNS system (and current source) see:

<http://developer.apple.com/opensource/internet/bonjour.html>
<http://developer.apple.com/opensource/cvs.html>

The code written by Chris Stawarz is available from:

<http://people.csail.mit.edu/cstawarz/mDNSResponder-107.6-wince.tar.gz>
http://people.csail.mit.edu/cstawarz/bonjour_wince_patch_20070305.txt

----- USING mDnsWrapper REQUIRES COMPLIANCE WITH THE Apache License -----
