Rohde & Schwarz FSP option generator ...

« on: February 02, 2014, 03:48:37 03:48 »

Hi,

I have made an "Option Generator" for "R&S FSP Spectrum Analyzer"

Generate option for :

Code:

```
"K5 - GSM/EDGE Application Firmware"
"K7 - AM/FM/PM Measurement Demodulator"
"B17 - IQ Online"
"K84 - 1xEV-DO BTS Application Firmware"
"K84 - 1xEV-DO MS Application Firmware"
"K9 - Power Meter"
```

```
"K76 - 3GPP TD-SCDMA BTS Application Firmware"
"K77 - 3GPP TD-SCDMA MS Application Firmware"
"K30 - Noise Figure Measurement"
"K82 - CDMA2000 BTS Application Firmware"
"K83 - CDMA2000 MS Application Firmware"
"K8 - Bluetooth Application Firmware"
"K40 - Phase Noise Measurement"
```

I think the source might help the friends of the forum to generate options for other "R&S" devices.

You have just to compile it with any C compiler!

New link in first post.

Try again.

Does anyone know how to unlock the software features on the Rohde & Schwarz ZVRE series VNA's?

Can this option generator be modified to do this?
