

Replacement Part (534 Assy.) for 3-178 (MRF 965)

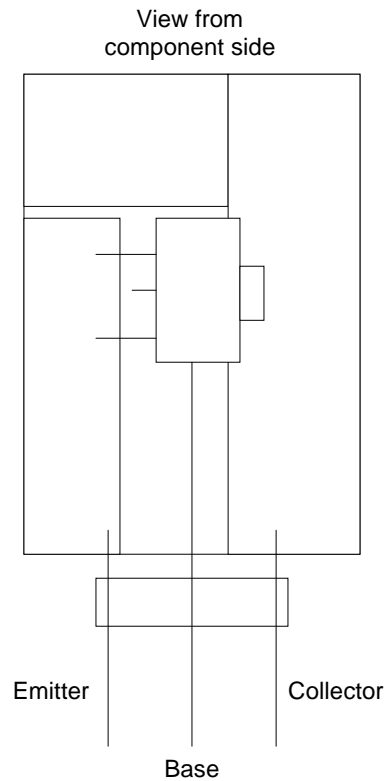

Figure 1

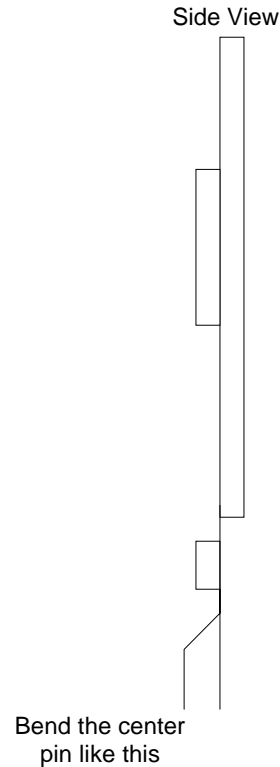

Figure 2

SR534 Assembly

With the component side of the assembly SR534 facing you, the left hand side of the connector is the Emitter, which is equivalent to the Tab side of the metal Can Transistor. The middle pin is the Base and the right side pin is the Collector. See figure 1.

Note: You need to move or bend the center pin connector toward you in order to resemble the metal Can Transistor (MRF 965). See figure2.

In DG535 instrument: The SR534 assembly component side will face into the board. The backside of the SR534 assembly faces main PC board's edge.
