Hi Ken,

Sorry for the delay, things are busy over here! Childcare is taking up even more time than I thought it would.

About the parcel:

Dimensions: 37x23x15cm

Weight: 1.7404kg, the precision is me using my repaired pan balance. Its not properly calibrated but I've used test weights and its fine.

My mobile number is +447414644435

Photos of the unit are attached(<https://photos.app.goo.gl/brERY3EmqTsJgyqn7>)! It's very well wrapped, so I imagine the slight case damage was something you were already aware of? the output head port also has a slightly out of alignment angle, but this might be expected.

I've removed the eBay invoice, the item now has no statement of value on it :-)

Kind regards,

Marcus
