MDO3014/54 with Every Option Plus Some

October 25th, 2015, 6:12 pm

Check out ebay item: 272026408102.

I wonder if it would all persist with the current firmware.

Updating to latest instrument firmware should not affect any currently installed options.

Well, with his listing prior to updating his firmware there were some extra options. Why doesn't my MDO list them as possible options: MDO3AUTOMAX, MDO3ENET, MDO3VID, MDO3USB, and MDO3TRIG? Are these actually available? cap

The options MDO3AUTOMAX, MDO3ENET, MDO3VID and MDO3TRIG (with the exception of MDO3USB) are not valid options. If the instrument listed those when it had V1.08 f/w and after upgrading to V1.2 they disappeared that would make sense. V1.08 was earlier f/w and did not have the correct listings for possible installed options.
