ANALOG DEVICES

MAX32570

Low-Power Arm Cortex-M4 Microcontroller with Contactless Radio for Secure Applications

General Description

The MAX32570 DeepCover® secure microcontroller provides an interoperable, secure, and cost-effective solution to build new generations of trusted devices. It can be used in single-chip applications such as PIN pads, mobile POS (MPOS), and secure card reader for PIN (SCRP), but also in dual-chip applications such as countertop and tablet POS. It includes all the essential functions to address those applications including a multi-protocol RF contactless controller and radio front-end, a dual smart card controller, a parallel camera interface, a magnetic stripe reader (MSR), a TFT controller, and a secure keypad controller.

The MAX32570 operates at 150MHz and is based on an Arm® Cortex®-M4 with FPU processor with 1MB flash, 760KB SRAM, 8KB OTP, 1KB of battery-backed AES self-encrypted nonvolatile SRAM (NVSRAM) and a 256-bit flip-flop-based battery-backed key storage. The flash memory is split into two banks of 512KB to provide flexibility when programming over the air. Error correction coding (ECC) (single-error correction double-error detection, or SEC-DED) for flash and SRAM provides extremely reliable code execution. The device embeds both secure public and private key cryptographic algorithms and a true random number generator (TRNG) compliant with SP-800-90A and SP-800-90B standards. It also features a number of security protections and detectors to enforce system integrity including a dynamic sensor controller, environmental sensors, and fault detectors.

The device features five flexible power modes. Multiple SPI, UART, and I2C serial interfaces, as well as a QSPI, 1-Wire® master, a USB 2.0 High-Speed device, and an optional 10/100 Ethernet MAC, allow for greater connectivity. Some device package variants offer flexible off-chip memory expansion that supports SD/SDHC, SDIO/eMMC cards, QSPI flash, and SRAM memories with eXecute In Place (XIP), encryption, and authentication. The device is available in a number of package variants, ranging from 121-pin BGA to 169-pin BGA, 0.65mm pitch packages.

Applications

- Secure Card Reader for PIN (SCRP)
- PCI Mobile Payment Terminals (MPOS)
- Countertop and Tablet POS
- Contact/Contactless PIN Pads
- ATM Keyboards

Benefits and Features

- High-Efficiency Microcontroller for Secure Battery-Powered Applications
  - Arm Cortex-M4 Processor with FPU up to 150MHz
  - 150MHz and 75MHz Internal Oscillators
  - Low-Power 7.37MHz System Clock Option
  - 1MB Flash, Organized into Dual Banks 2 x 512KB
  - 760KB (608KB ECC) SRAM
  - Optional Error Correction Code (ECC-SEC-DED) for Cache, SRAM, and Internal Flash
  - 1KB AES Encrypted NVSRAM, 8KB Internal OTP
- Scalable Cached External Memory Interfaces
  - QSPI Flash with AES-GCM and XiP
  - QSPI SRAM with AES-GCM and XiP
  - 150Mbps SDHC/eMMC/SDIO/microSD Interface
- Security Features Facilitates System-Level Protection
  - ISO 14443A/B, JIS X 6319-4, ISO 15693 Contactless Reader with Internal Transceiver
  - Secure Bootloader with Public Key Authentication
  - Hardware AES, DES, ECDSA and SHA-2 Engines
  - 10-Line Secure Keypad Controller
  - TRNG (SP-800-90A and SP-800-90B)
  - Six External Dynamic Tamper Sensors
  - Die Shield with Dynamic Random Signal
  - 1x 256-Bit and 2x 128-Bit Flip-Flop-Based AES Key Storage
  - Temperature and Voltage Tamper Monitor
  - Fault Detectors
- Optimal Peripheral Mix Provides Platform Scalability
  - 16-Channel DMA
  - One QSPI/SPI Master
  - Up to Three SPI Master (37.5MHz)/Slave (75MHz)
  - Up to Six UARTs with Flow Control
  - Up to Two ISO 7816 UART/Smart Card Controller
  - Up to Three 1MHz I2C Master/Slave
  - Up to Three Channels 7.8ksps 10-Bit Sigma-Delta ADC
  - USB 2.0 High-Speed Device Interface with PHY
  - 10/100 Ethernet MAC with RMII/MII Support
  - 24-Bit TFT LCD Controller
  - 12-Bit Parallel Camera Interface
  - Triple-Track Magnetic Stripe Head Interface
  - Eight Pulse Train Generators
  - Six 32-Bit Timers, Two HTimers
  - 1-Wire Master, Two Watchdog Timers
  - Real-Time Clock (RTC)

MAX32570   Low-Power Arm Cortex-M4 Microcontroller
with Contactless Radio for Secure Applications
