

Dynamically create your own combination logic device

Dual PCB configurable logic

Benefits

Design flexibility

- › Large selection standard and non-standard functions
- › Up to 49 different configuration options available in one package

Systems level savings

- › Up to a 20% reduction in static power
- › Up to a 20% reduction in space savings

Features

- › Wide supply voltage range: 0.8 V to 3.6 V
- › Low static power consumption: $I_{CC} = 0.9\mu\text{A}$ (max)
- › I_{OFF} circuitry enables sub-module partial power down mode operation

The savings are endless with dual PCB configurable logic

Each family device (-57/-58/-97/-98) implements two independent copies of the PCB configurable logic gates into one package

Part number	Available functions						
74AUP2G57							
74AUP2G58							
74AUP2G97							
74AUP2G98							

Package suffix	DP	GU
	10-pin (TSSOP)	10-pin (XQFN)
Package	SOT552-1	SOT1160-1
Width x length x height, minimum pin spacing (pitch) (dimensions in mm)	3.0 x 4.9 x 1.1, 0.5	1.4 x 1.8 x 0.5, 0.4
